PowerSteering Executives to Present at the iSixSigma Live! Summit & Awards

Sessions to Focus on Six Sigma Project Selection, Leadership and Change Management

January 7, 2009

CAMBRIDGE, MA -- PowerSteering Software, the leading provider of on-demand PPM solutions for managing IT, Lean Six Sigma, PMOs and other enterprise initiatives, is proud to announce that Randy Clark, Director of Six Sigma, will conduct a Master Workshop at the upcoming iSixSigma Live! Summit & Awards, being held in Miami from January 13-16.

Mr. Clark will lead an interactive session on “Removing Politics from Project Selection,” and deliver practical insights into how Six Sigma programs can improve the value of their project portfolio by up to 30% through:

- Evaluating projects objectively using a consistent methodology
- Identifying candidates for replication
- Increasing productivity by decreasing bureaucracy
- Fostering collaboration, community and communication
- Incorporating continuous feedback loops

In addition, PowerSteering founder David Boghossian will moderate a panel discussion on “Leadership and Change Management,” featuring executives from EMC and the U.S. Department of Defense, both PowerSteering clients.

“PowerSteering is excited to play such a central role in iSixSigma’s inaugural Summit,” stated Mr. Boghossian. “From the beginning, our mission has been to help leaders drive change and innovation in their organizations. We have been involved with over 100 Six Sigma deployments, but there is always more to learn and we always welcome the chance to discuss challenges and best practices with practitioners in a face-to-face setting.”

Focusing on the theme “Back to Breakthrough,” the iSixSigma Live! Summit will feature case studies, profiles, strategies and tactics for achieving true breakthrough operational excellence. The speaker roster features some of the world’s most prominent Six Sigma practitioners, including PowerSteering customers Textron, Toronto Dominion, Merck, and NewPage Corporation.

As a Gold Sponsor, PowerSteering Software will have an exhibit booth in the Solutions Pavilion and be available for questions and product demonstrations throughout the course of the event. To learn more about the Summit and PowerSteering's participation, visit the iSixSigma Live! Summit & Awards homepage: <http://live.isixsigma.com/events/summit/miami/2009/default.html>.
