PowerSteering Announces Expanded PPM Integration Capabilities

Introduces 150 additional data integration sources through partnership with Pervasive Software

March 11, 2009

CAMBRIDGE, MA -- [PowerSteering Software](#), the leader in on-demand [project & portfolio management \(PPM\) solutions](#) for managing IT, Lean Six Sigma, PMOs and other enterprise initiatives, today announced the introduction of new integration capabilities.

Through a partnership with [Pervasive Software](#) (NASDAQ:PVSW), a global leader in SaaS data management and agile integration software, PowerSteering has expanded its integration functionality to include 150 additional data sources to provide customers with a consolidated view of all critical information. Relevant portfolio management data from time tracking software, financial applications, reporting tools, Active Directory services, human resource and ERP systems can quickly and easily be reflected in PowerSteering.

“PowerSteering’s seamless integration to any data source means our customers will benefit from accurate, timely and complete information to improve portfolio visibility, analysis, and decision making,” reports Tibor Vais, PowerSteering’s Senior Vice President of Product Management. “With Pervasive’s proven track record of SaaS integration excellence, we can meet all of our customers’ integration needs regardless of application, file type, or database server.”

“Pervasive Software continues to lead the way in empowering innovative SaaS partners like PowerSteering to provide integration offerings that truly align with their customers’ expectations of SaaS-friendly speed and economics,” said Mike Hoskins, Pervasive CTO and general manager, Integration Products for Pervasive. “Industry leaders like PowerSteering continue to adopt Pervasive’s SaaS-enabled integration technology to gain a competitive edge and deliver greater value to their customers.”

Customers who use PowerSteering for portfolio, resource and project management or time tracking can instantly share relevant data between PowerSteering and their ERP or financial applications, including Oracle, PeopleSoft and SAP, or collaboration tools like Microsoft’s SharePoint. They can also integrate with third-party Business Intelligence systems to accommodate their unique reporting and analytic requirements.
