PowerSteering Holds 4th Annual Customer Leadership Conference

Presentations from the U.S. Army, Deloitte, the Department of Defense, Owens-Illinois, Praxair, and Others Sparks Productive Dialogue

September 15, 2008

Cambridge, MA - PowerSteering, the leading SaaS Enterprise PPM software attracted a record number of customer attendees and strategic partners at its 4th annual Customer Leadership Conference held in Cambridge, MA September 9-11.

The event afforded executives an opportunity to discuss how they are expanding their usage of PowerSteering's on-demand PPM software, increasing user adoption and improving portfolio results. Attendees played an integral role throughout the event through presentations, best practice sharing, and an interactive exercise to vote for new feature candidates on PowerSteering's software roadmap.

"I was delighted by the strong attendance especially given the current economic climate that has curtailed some non-essential travel. The conference has become an important source of Voice of the Customer input that guides our product direction, and we are very fortunate that our customers are so receptive," remarked Stephen Sharp, PowerSteering's Chief Executive Officer.

Several of PowerSteering's strategic partners including BMG, Booz Allen and Ross Technologies also attended the event and described how their clients are benefitting from the use of PowerSteering.

The Leadership Conference follows PowerSteering's regional customer meetings held in the Midwest and Mid Atlantic regions.
