NOVACES Sponsors Webinar on the Integration of Lean Six Sigma with Theory of Constraints in MRO.

The International Society of Six Sigma Professionals (ISSSP) will host the program as part of its Focused Sessions for the advancement of education, research and implementation of Six Sigma.

New Orleans December 13, 2007 -- NOVACES, a premier provider of Lean Six Sigma (LSS) consulting and training services, announced today that it will present the synergistic advantages of using Theory of Constraints (TOC) with Lean Six Sigma (LSS) to better focus efforts to achieve continuous system improvement. The event features contributions from the company's team members Dynamics Research Corporation (DRC) and Avraham Goldratt Institute (AGI) who have been pioneering this breakthrough methodology together.

This integrated approach recognizes that interdependencies among processes must be considered to improve an enterprise's output. While both Lean Six Sigma and TOC have been successfully implemented for some time, their effectiveness in tandem is now being proven. The value that TOC brings to improving an organization's processes is its disciplined manner of identifying what to change, what to change it to and how to achieve the change.

"TOC identifies the constraints and core conflicts that exist in an enterprise and points to the solution that will best align it with the strategic objectives of the overall system," said CEO Bahadir Inozu, Ph.D. of NOVACES. The result of the approach helps to build the tactical plan that will transition an organization.

“ TOC identifies the constraints and core conflicts that exist in an enterprise and points to the solution that will best align it with the strategic objectives of the overall system ”

This combination of methodologies is shown to deliver powerful results in the MRO (Maintenance, Repair, Operations/Overhaul) environment by focusing on the system, identifying constraints and removing waste and defects from the processes. The webinar will take place December 18, 2007 at 10:00 AM EST. Attendees are invited to register at www.isspp.com.

Our Partners in TOC/LSS Integration

About Dynamics Research Corporation

Dynamics Research Corporation (DRC) is a leading provider of mission-critical technology management services and solutions for government programs. DRC offers forward-thinking solutions backed by a history of excellence and customer satisfaction. Founded in 1955, DRC is a publicly held corporation (NASDAQ: DRCO) and maintains more than 25 offices nationwide with major offices in Andover, Massachusetts; Vienna, Virginia; and Fairborn, Ohio. For more information please visit our website at www.drc.com.

About Avraham Goldratt Institute

AGI is the birthplace of the Theory of Constraints (TOC). It was founded as an educational institution in 1986 by Dr. Eli Goldratt, author of the bestseller *The Goal*, *It's Not Luck*, and *Critical Chain*. Today, AGI is home to the world's foremost TOC experts and practitioners, with 14 offices across six continents. AGI is the world's largest consulting firm specializing in the application of TOC to achieve significant bottom-line results in organizations as diverse as industry, services, government, education, military, and healthcare. For more information please visit our website at www.agi.com.
