

Improve Lean Six Sigma Deployment ROI

The Best Run Businesses
RUN BETTER
on PowerSteering!

"PowerSteering was the most adaptable Lean Six Sigma system to fit our needs. The solution aligned with our corporate strategic goals without sacrificing any division's individuality."

Dale B. Tompkins
VP, Strategy & Corporate Development
Brunswick Corporation

Does your Lean Six Sigma program still rely on spreadsheets and shared folders to manage projects, share documents, and track benefits? How many hours a month do your MBBs spend aggregating and formatting data to compile status reports?

Welcome to a better way: PowerSteering Enterprise. Rated highest in an independent evaluation of project tracking software in iSixSigma Magazine, PowerSteering helps reduce administrative overhead and boost project benefit through:

- **Strategic Project Selection**
Gather, score, and prioritize ideas to choose the most strategic, high-impact projects.
- **Streamlined Reporting**
Automatically roll-up data and generate status reports at the click of a button.
- **Powerful Benefit & Cost Tracking**
Aggregate, validate, and allocate both hard and soft dollars, through project completion and beyond.
- **Best Practice & Project Replication**
Leverage past successes with a Best Practice Library, Find Similar Projects tool, and powerful search.
- **Just-in-Time Mentoring**
Manage Belts more efficiently with dashboards, automated alerts, online gate reviews, and issue & risk management.
- **Improved Project Execution**
Make Belts more effective with project & document templates and tools for collaboration.
- **Just Right Functionality**
Configurable by role and business area to drive utility, usability, and user adoption.
- **On-Demand Availability**
Support distributed teams with anytime, anywhere access. Deploys quickly & scales easily, with no software to install.
